SICK OR HURT?

HOW TO KNOW WHERE TO GO

KARU

Medical Associates

Doctor, Urgent Care, or Emergency Room?

Deciding where to go when you're sick or injured can be confusing.

To avoid unnecessary and costly ER visits, let us help make this decision easier.

Call us **first** before going to an Urgent Care or Emergency Room. We want to be your first choice when it comes to your medical care.

Karu Medical Associates reserves **same day appointments** for urgent care needs. Call us during office hours for an appointment. We may direct you to an Urgent Care or Emergency room if appropriate.

After hours, weekends, and holidays, a physician is available by phone. Just call our office phone number **989-497-5278**. A doctor will speak with you and guide your care.

Save medication refills, appointment inquiries, and management of chronic conditions for office hours.

We want to know when you're sick or injured!

Urgent Care Clinics

are used for care of non-life-threatening conditions

Sprains/strains
Cuts that may need stitches
Throat/ear/eye infections
Urinary tract infections
Fever
Flu symptoms
Nausea/vomiting

Emergency Rooms
